

### Roof Surfacing Coverage:

- **Shingle:** Full RCV through **15 years**; the roof surfacing payment schedule applies after 15 years.
- **Tile/Metal:** Full RCV through **20 years**; the schedule applies after 20 years.
- The roof surfacing payment schedule is automatically included when the roof is **over 10 years old**.
- Removal of the schedule on roofs ages **10–14** may require a pre-bind roof inspection depending on condition.
- **Shingle roofs over 20 years** and **Tile/Metal roofs over 25 years** require **Underwriting approval and a pre-bind roof inspection on Sypher's template**.

### INELIGIBLE ROOF CONDITIONS/TYPES:

- Worn or damaged roofs
- More than **one layer of roof surfacing**
- Less than **5 years of useful life remaining**
- Solar shingles/solar tiles, including **Tesla solar roofs**
- Flat roofs with less than a **2:12 pitch**, unless they qualify as superior construction
- Roofing materials outside Sypher's approved materials

Approved roofing materials include:

- Asphalt shingle
- Clay/concrete tile
- Metal (**not tin**)
- Slate tile
- Reinforced concrete

### SOLAR PANELS — IMPORTANT

Sypher **can accept rack-mounted solar panels**, but the home and solar system must meet ALL eligibility requirements:

- Solar installed **after 2016**
- Installed by a **licensed solar contractor**
- Properly permitted
- Post-installation inspection completed
- **Tier 1 Interconnection Agreement**
- Cannot be installed on a **clay or cement tile roof**
- If installed on a **shingle or metal roof**, the current roof must be **10 years old or newer**
- If installed on a **flat roof**, the current roof must be **5 years old or newer**

**Solar roof systems are NOT eligible.** This includes solar shingles or tiles that are part of the actual roofing system, including Tesla.

For an eligible property, optional solar coverage can be added from **\$1,000 up to 20% of Coverage A** in \$1,000 increments. Solar coverage above **\$50,000 requires Underwriting approval prior to binding.**

### **CONSTRUCTION TYPE — ENTER IT CORRECTLY**

Please make sure you are accurately identifying the construction type when quoting:

#### **Frame**

- Exterior walls are wood-framed.
- Generally rates as Frame when wood framing is greater than 33% and the exterior finish does not qualify as masonry veneer.

#### **Masonry**

- Solid masonry exterior walls such as concrete block or poured concrete.
- Rates as Masonry when concrete block is **67% or greater**.

#### **Masonry Veneer**

- Wood-framed home with qualifying exterior veneer.
- When more than **50% of the exterior finish** is brick/stone veneer, cement-fiber/Hardie, hardboard, or solid brick, it may rate as Masonry Veneer.

#### **INELIGIBLE CONSTRUCTION includes:**

- Mobile homes
- Modular homes
- Log homes
- Pre-fabricated homes
- Kit homes
- **EIFS construction**
- Non-habitational or originally non-residential dwellings

#### **IN-GROUND POOLS**

This is another important difference to remember:

**An in-ground pool is part of Coverage A.**

The replacement cost of the pool must be included in the **dwelling RCE**. It is **not rated as an Other Structure**.

#### **POOL RISKS ARE INELIGIBLE IF:**

- The pool is not surrounded by a **self-latching fence/enclosure at least 4 feet high**
- There is a **diving board**
- There is a **pool slide**
- There is an **empty in-ground pool**
- There is an unprotected hot tub/spa

Also, properties using platforms to rent the pool, backyard, courts, home gym, or similar spaces are **ineligible**.

## OTHER IMPORTANT INELIGIBLE RISKS

Please watch for these before quoting:

- Vacant or tenant-only occupied properties
- Owner occupies the home **less than 3 months during any 12-month period**
- Airbnb, VRBO, or other home/premises-sharing exposure
- Business use involving client or employee foot traffic
- Mobile, modular, log, prefab, kit, or EIFS homes
- Protection Class 10
- Structures partially or completely over water
- Condemned properties
- Commercial farming/ranching/agricultural operations
- Properties built on a landfill/refuse site
- Properties not accessible year-round by fire equipment
- Prior/current sinkhole or earth-movement activity
- Uncorrected building/fire code violations
- Properties in disrepair or with existing damage
- Trampolines, skateboard/bicycle ramps
- Certain animals and restricted dog breeds
- Certain prior losses, including liability/fire losses and water losses

## RISKS THAT MAY REFER TO UNDERWRITING

Remember that a referral is **not necessarily a decline**. Examples include:

- More than **5 acres** or isolated risks
- Coverage A above **\$2 million**
- Dwelling under construction
- Galvanized or cast-iron plumbing
- High-profile insureds
- Historic registry homes
- Coverage lapse greater than 30 days
- Certain prior losses
- Protection Class 9
- Renovations
- Older roofs exceeding the standard guidelines
- Solar coverage above \$50,000
- Tank water heaters over 15 years
